

Description

Four wonderfully interesting 'art meets radiator' products. The four designs have been created by architect and artist Mariano Moroni and consist of four unique art pieces - Artic and Corallo as well as a Lagoon series in two colours

Artic represents the attraction of a snow filled abstract landscape created through a combination of grey and black lines. The blurred horizons evoke a sea, land and sky joined together in a wintry vista. Corallo is a combination of primitive signs and colours offering up a joyful optimism and stimulation. Finally the two Lagoon options bring home the effect of water to bring a piece of nature into our daily lives.

These are available in four sizes and can be accessorized with a selection of towel rails making the Frame series a versatile, stylish and functional art radiator.
