

Description

The Max has proved a welcome and popular addition to The Radiator Centre range.

Seen as a chunkier, more contemporary upgrade of a standard steel column radiator, the ratio of high heat output to size has made it a winning style. And now it comes available in 3 widths at 1800mm high and 4 widths at the lower 550mm high, as well as two standard colour options - White RAL 9016 and Matt Anthracite RAL 7016.

We have seen the Max used in bathrooms, kitchens and living spaces and it works every time. The Max is also now available with an option for slip-on feet, as well as towel rail options for the Vertical version.

It is now also available in a huge range of RAL colours.
